

New Wheat Varieties

Forrest^Φ

Long season APW wheat

- High yielding long season variety
- APW classification in VIC, upgrade pending in SA and southern NSW
- Resistant to all three rusts and Yellow leaf spot
- First Australian wheat variety with resistance/tolerance to Wheat streak mosaic virus

LRPB Envoy^Φ

APW wheat for WA

- Mid to long season maturity
- Large grain size, low screenings
- Good resistance to WA rusts
- Eligible for APWN grade

Milling Wheat Range

| | |
|----------------------------|--|
| Yitpi ^Φ | • Established AH wheat in VIC, SA, southern NSW & WA |
| Catalina ^Φ | • Stem rust resistant, AH alternative to Yitpi in VIC & SA |
| Guardian ^Φ | • High yielding APW for medium rainfall zones in SA |
| Sentinel 3R ^Φ | • High yielding rust resistant ASW for long growing seasons |
| EGA Wedgetail ^Φ | • High quality milling wheat with excellent grazing potential |
| Lang ^Φ | • APH wheat with Black point resistance for QLD & northern NSW |
| EGA Hume ^Φ | • APH wheat for central and southern QLD |
| Petrie ^Φ | • APH wheat for central and southern QLD |

Durum Wheat Range

| | |
|-----------------------|---|
| Capraroi ^Φ | • Mid maturity, good straw strength, excellent grain quality durum for QLD, northern NSW & SA |
| Jandaroi ^Φ | • Very quick maturity durum with excellent grain quality for QLD & northern NSW |

Feed Wheat Range

| | |
|------------------------|---|
| Preston ^Φ | • New high yielding mid-long season white grain wheat with milling market potential |
| Brennan ^Φ | • Early forage production, awnless white grain |
| Mackellar ^Φ | • BYDV resistant, awnless red grain |
| Rudd ^Φ | • Mid to long season, awnless red grain |
| Tennant ^Φ | • Long season, awnless red grain |

This symbol indicates that a variety is protected by Plant Breeders Rights (PBR). All Seednet varieties are protected by PBR.

Unauthorised commercial propagation or any sale, conditioning, export, import or stocking of propagating material is an infringement under the PBR Act (1994).

New Barley Variety

Scope ^Φ

Imi-tolerant feed barley

- Mid maturity, medium-tall plant type
- Good tolerance to Imidazolinone herbicide (registration pending)
- Undergoing malt evaluation

Barley Variety Range

| | |
|------------------------|---|
| Hindmarsh ^Φ | • Newly accredited FOOD grade, early maturity, high yield, plump grain |
| Buloke ^Φ | • Mid maturity malting barley for WA, SA, VIC & southern NSW |
| Baudin ^Φ | • Excellent malt quality barley for VIC , southern NSW (& WA) |
| Shepherd ^Φ | • New quick maturity northern variety with large grain size and good straw strength |
| Grout ^Φ | • Very quick maturity feed variety for northern regions |
| Fitzroy ^Φ | • Malt barley for long growing seasons in northern region |

New Pulse Varieties

PBA Twilight ^Φ

Kaspa type field pea

- Early flowering and early maturing shatter resistant, semi leafless field pea
- For short season environments or yield potential less than 1.5t/ha

PBA Gunyah ^Φ

Kaspa type field pea

- Early and long flowering shatter resistant, semi leafless field pea
- For low and medium rainfall regions where yield potential greater than 1.5t/ha

Pulse Variety Range

Chickpeas

| | |
|---------------------------|--|
| PBA HatTrick ^Φ | • New benchmark northern desi chickpea with Ascochyta blight and Phytophthora resistance |
| PBA Slasher ^Φ | • New southern and western region desi chickpea with excellent Ascochyta blight resistance |
| Flipper ^Φ | • Established northern region desi chickpea |
| Yorker ^Φ | • Northern region desi chickpea with high level of Phytophthora resistance |
| Moti ^Φ | • Central QLD desi chickpea (no resistance to Ascochyta blight) |
| Almaz ^Φ | • Large grain size kabuli chickpea for medium-high rainfall regions |

Lentils

| | |
|---------------------|---|
| Nipper ^Φ | • Small red lentil with Ascochyta blight and Botrytis resistance |
| Boomer ^Φ | • Large green lentil with good early vigour and tall plant height |

Other

| | |
|-----------------------|--|
| Kaspa ^Φ | • Late flowering, shatter resistant, semi leafless field pea |
| Nura ^Φ | • Foliar disease resistant and low lodging risk faba bean |
| Jindalee ^Φ | • Late flowering narrow leaf lupin |
