

TRI-POWER®

Seed Treatment with Grunt

GrowSure

Name

TRI-POWER Seed Treatment

Description

Seed Treatment for the control of various seed and soil borne diseases and insect pests in cereals

• Product Type

Seed Treatment

• Chemical Group and Mode of Action

Group 4A insecticide
Group 3 and 4 fungicides

• Pack Sizes

10L and 100L

Crop Registrations

TRI-POWER Seed Treatment is registered in wheat, barley, oats and triticale.

Diseases and Pests Controlled

In wheat and barley, TRI-POWER controls damping-off (*Pythium irregulare*) and provides excellent efficacy against Rhizoctonia bare patch (*Rhizoctonia solani*). TRI-POWER offers highly effective smut and bunt control in wheat, barley, oats and triticale, and provides invaluable protection against feeding damage caused by wheat aphid and corn aphid, protecting against the spread of barley yellow dwarf virus (BYDV).

Pythium

Rhizoctonia Bare Patch

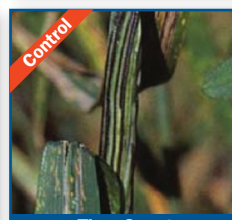

Aphids & BYDV

Covered Smut

Loose Smut

Flag Smut

Features and Benefits

Feature	Benefit
Controls damping-off and provides excellent activity against Rhizoctonia bare patch	Healthier seed, seedling and root system
Contains flutriafol	Highly soluble, highly systemic triazole ideal for use as a seed treatment with excellent translocation and activity on smut and bunt
Contains imidacloprid	Proven industry performer against sucking pests, ideal for Integrated Pest Management (IPM)
Only Seed Treatment on the market to contain 2 fungicides and an insecticide	Easy to use formulation, no additional mixing of actives is required
Highly visible RED liquid	Clearly identifies treated seed compared with untreated, for ease of identification

TRI-POWER®

Seed Treatment with Grunt

TRI-POWER®
SEED TREATMENT

Application: 400ml/100kg

Apply neat, or dilute with water to a total volume of 600ml (product + water) per 100kg seed.

Ensure even and thorough coverage of the seed.

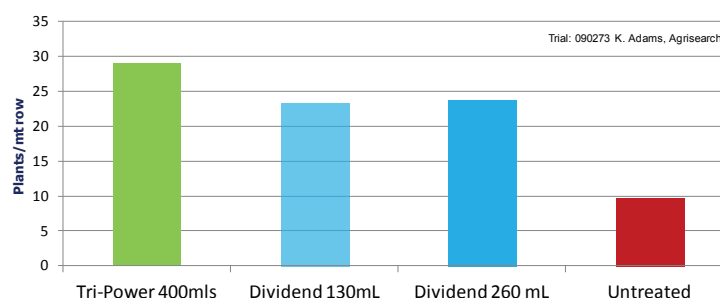

Withholding Periods

Harvest: Not required when used as directed

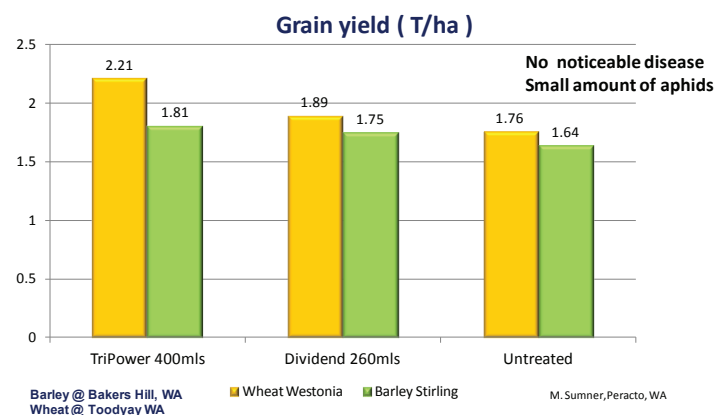

Grazing: Do not graze or cut for stock food within 9 weeks of sowing

Trial Results

TRI-POWER demonstrates excellent crop safety, with superior emergence in Rhizoctonia infected soil compared with Dividend®

TRI-POWER's control of Damping-off (Pythium irregulare), excellent activity on smut and bunt and sucking pests, and robust activity on Rhizoctonia bare patch ensures the seedling gets off to the best start possible, maximizing yield potential
